Video projects

2006-today

Worked on various Video projects and concepts. Have created Intense and Extreme Action sports videos with fast paced editing, but also some calm and easy to watch Promotional videos and ads. Being part of all video production processes, including pre-production and planning, shooting and execution, to post-production, video editing, VFX, rhythm and pacing.

IT projects

2008-2012

Have worked individually and in a team on many IT projects during the studies for Bachelor in IT Engineering in VIA University College, where work ethics was crucial part of learning. Being focused and involved, working and communicating with an international team to achieve projects' purpose in the given deadlines.
